DATA ANALYST

PROFESSIONAL SUMMARY

Google Data Analytics Professional Certificate holder with hands-on experience building end-to-end analytics projects using PostgreSQL, SQL, Microsoft SQL Server, Excel, Power Query, Power Pivot, DAX, Power BI, and Tableau. Skilled in data cleaning, validation, transformation, data modeling, KPI development, business analysis, dashboard development, and executive reporting. Built four portfolio projects using real-world public datasets, translating business questions into actionable insights and business recommendations. Combines analytical skills with operational experience in SAP IM/MM, inventory control, reconciliation, and root-cause analysis.

TECHNICAL SKILLS

SQL & Databases: SQL, PostgreSQL, Microsoft SQL Server, CTEs, joins, aggregations, window functions, ranking functions, KPI development, data validation, year-over-year analysis

Excel & BI: Microsoft Excel, Power Query, Power Pivot, DAX, Power BI, Data Models, PivotTables, PivotCharts, KPI Development, Interactive Reporting

Analytics: Data cleaning, data transformation, data validation, exploratory data analysis, trend analysis, time-series analysis, geographic analysis, industry analysis, risk analysis, reporting

Visualization: Power BI, Tableau, dashboard development, data visualization, executive reporting, business intelligence, KPI reporting

SELECTED PROJECTS

MARKETING CAMPAIGN PERFORMANCE ANALYSIS

Tools: PostgreSQL, SQL, Power BI

• Analyzed 10,000+ digital advertising campaign records to evaluate marketing profitability, customer acquisition efficiency, and return on advertising spend.

• Imported, validated, and analyzed campaign data in PostgreSQL using SQL to assess platform performance, campaign effectiveness, and budget allocation opportunities.

• Built an executive-focused Power BI dashboard featuring Total Ad Spend, Total Profit, Average ROAS, and Average CPA to support performance monitoring and decision-making.

• Identified Google Ads as the highest-profit platform, contributing approximately 33% of total campaign profit, while Google Ads and Facebook generated nearly 60% of overall profitability.

• Delivered data-driven budget allocation recommendations by identifying Conversion campaigns as the highest-performing objective (9.2x ROAS), Facebook as the most efficient acquisition channel ($118 CPA), and TikTok as the highest profit-efficiency platform ($10.18 profit per $1 invested).

SBA 7(a) SMALL BUSINESS LENDING ANALYSIS | 2022–2025

Tools: Microsoft Excel, Power Query, Power Pivot, DAX, PivotTables, PivotCharts

- Analyzed SBA 7(a) loan-level data from 2022–2025 to evaluate lending growth, geographic and industry concentration, charge-off risk, and reported employment impact.
- Used Power Query to clean, transform, standardize, and validate a large public lending dataset, including missing-value and date-field handling.
- Built an Excel Data Model with Fact Loans, Dim Date, and supporting lookup tables to support consistent time-based and dimensional analysis.
- Developed DAX measures and KPI reporting for total SBA lending, total loans, average loan size, average interest rate, and charge-off rate.
- Built an interactive Excel dashboard using PivotTables, PivotCharts, and connected slicers for year, state, industry, business age, and loan status.
- Found that SBA lending nearly doubled from 2022–2025; California accounted for approximately $16B, or 13% of total SBA loan dollars.
- Analyzed charge-off exposure across states and industries and identified segments with elevated observed charge-off rates, interpreting results alongside loan volume.
- Evaluated reported employment impact, identifying approximately 2.5M jobs supported during the analysis period and approximately 66% growth in reported jobs supported.

U.S. EMPLOYMENT TRENDS & INDUSTRY GROWTH ANALYSIS

Tools: SQL Server, SQL, Tableau, Excel

- Designed and implemented a dimensional star-schema data model to support scalable U.S. labor-market analysis.
- Developed SQL workflows using CTEs, window functions, ranking functions, moving averages, aggregations, and year-over-year growth calculations.
- Analyzed benchmark-revised Bureau of Labor Statistics employment data across major U.S. industries and time periods.
- Built an interactive Tableau dashboard for dynamic analysis of employment trends, industry performance, seasonality, volatility, and concentration.
- Identified Health Care & Social Assistance as the largest employment sector at 21.0% and a leading growth sector at +3.5%.
- Quantified contractions in Information (-2.1%), Manufacturing (-1.2%), and Professional & Business Services (-0.7%).
- Validated transformed analytical results against official BLS benchmark-revised releases to support data accuracy.

FDA FOOD RECALL ANALYSIS

Tools: SQL, Excel, Tableau

- Analyzed more than 3,100 FDA recall events to evaluate recall frequency, severity, classification, and public-health risk exposure.
- Performed year-over-year comparisons using SQL aggregations, CTEs, and trend-analysis techniques.
- Built visualizations highlighting recall classification, geographic distribution, and monthly recall activity.
- Identified a 15.4% increase in high-risk Class I recalls despite relatively stable overall recall volume.
- Determined that contamination-related issues represented 80% of the top recall causes.
- Translated findings into recommendations focused on recall prevention, regulatory monitoring, and risk management.

PROFESSIONAL EXPERIENCE

INVENTORY CONTROL ASSOCIATE

Kaufman Company | 2026 – Present

- Perform daily inventory reconciliation analysis to ensure alignment between physical inventory counts and system records.
- Investigate inventory discrepancies, variances, and transaction errors through data analysis, root-cause investigation, and corrective action.
- Analyze cycle count and inventory audit results to identify trends, improve inventory accuracy, and reduce recurring issues.
- Maintain inventory data integrity within CribMaster by validating inventory transactions, stock adjustments, and record accuracy.
- Support operational decision-making by monitoring inventory metrics and identifying process-improvement opportunities that enhance inventory control and efficiency.

WAREHOUSE ASSOCIATE – INVENTORY OPERATIONS

The Tile Shop | Warwick, RI | August 2025 – June 2026

- Managed inventory transactions and stock movements using SAP IM/MM while maintaining accurate inventory records.
- Performed cycle counts, inventory audits, and inventory reconciliation to identify and resolve discrepancies.
- Processed goods receipts and goods issues while validating inventory transactions.
- Used RF scanners and barcode systems to track inventory and warehouse activity.
- Investigated inventory discrepancies using systematic problem-solving and root-cause analysis.

EDUCATION & CERTIFICATION

Google Data Analytics Professional Certificate — Completed December 2025

Community College of Rhode Island (CCRI) — Coursework toward Associate Degree
